All requests for authorization for the services described by this medical policy will be reviewed per Early and Periodic Screening, Diagnostic and Treatment (EPSDT) guidelines. These services may be authorized under individual consideration for Medicaid members under the age of 21-years if the services are judged to be medically necessary to correct or ameliorate the member's condition. Department of Medical Assistance Services (DMAS), Supplement B - EPSDT (Early and Periodic Screening, Diagnosis and Treatment) Manual.

Purpose:

This policy addresses 23-Hour Crisis Stabilization

Description & Definitions:

Mental Health Services (formerly CMHRS), App. G - Comprehensive Crisis and Transition Services p. 15 (02/14/2023)

23-Hour Crisis Stabilization provides ongoing assessment, crisis intervention and clinical determination for level of care to individuals experiencing a behavioral health crisis. Services are provided for a period of up to 23 hours in a community and center-based crisis stabilization setting including outpatient hospital settings that have an Outpatient Crisis Stabilization license. This service must be accessible 24/7 and is indicated for those situations wherein an individual is experiencing a behavioral health crisis and requires a safe environment for observation and assessment prior to determination of the next level of care. Although not required, 23-Hour Crisis Stabilization services typically co-locate with RCSUs as part of a continuum of crisis care.

23-Hour Crisis Stabilization is appropriate for individuals who have urgent behavioral health needs including but not limited to significant emotional dysregulation, disordered thought processes, substance use and intoxication resulting in behavioral crisis and environmentally de-stabilizing events that require multi-disciplinary crisis intervention and observation to stabilize the immediate crisis and determine the next appropriate step in the plan of care.

The goals of this service include but are not limited to:

- Opportunity for thorough assessment of crisis and psychosocial needs and supports throughout the full 23 hours of service to determine the best resources available for the individual to prevent unnecessary hospitalization.
- **Assessment:**
 - Psychiatric evaluation
 - Further diagnostic testing (drug screens, lab tests and monitoring for emergent medical needs),
 - Level of care determination
- **Care Coordination:**
 - Screening and referral for appropriate behavioral health services and community resources.
- **Crisis Intervention:**
 - Improvement of acute symptoms,
 - Resolution of acute intoxication,
 - Safety planning
- **Health Literacy Counseling:**
 - Provision of medication (if clinically indicated) and monitoring of response
 - Targeted education concerning diagnosis and treatments

Covered Service Components of 23-Hour Crisis Stabilization include:

- Assessment
- Care Coordination
- Crisis Intervention
- Health Literacy Counseling
- Individual and Family Therapy
- Peer Recovery Support Services
- Skills Restoration
- Treatment Planning

Exclusion Criteria:

Mental Health Services (formerly CMHRS), App. G - Comprehensive Crisis and Transition Services p. 20 (02/14/2023)

In addition to the “Non-Reimbursable Activities for all Mental Health Services” section in Chapter IV of the DMAS manual, the following exclusion criteria and service limitations apply:

- The individual is not appropriate for this service if there is a presence of any condition of sufficient severity to require acute psychiatric inpatient, medical, or surgical care.
- Temporary housing shall not be conditioned upon an individual receiving any crisis service and housing (including temporary housing) is not a reimbursable component of this service. If an individual meets admission criteria for this service and housing is an assessed need, this should be noted as a need on the registration to support coordination of resources for the individual. While loss or lack of housing may contribute to a behavioral health crisis, the solution to the housing need must be addressed through non-Medicaid funding or services related to housing. 23-hour Crisis Stabilization should address the behavioral health crisis triggered by the stressor of a housing problem using interventions and a plan directed explicitly at the behavioral health needs and symptoms. Providers are prohibited from using Medicaid reimbursement to cover housing costs for an individual and any funds used for this purpose will be retracted.
- Services may not be provided in facilities that meet the definition of an Institutions of Mental Disease (IMDs) as defined in 42 CFR 435.1010

Admission Criteria:

Mental Health Services (formerly CMHRS), App. G - Comprehensive Crisis and Transition Services p. 19 (02/14/2023)

23-Hour Crisis Stabilization is considered medically necessary for **all of the** following:

- 1. The individual must be experiencing an active behavioral health crisis;

- 2. Documentation indicates evidence that the individual currently meets criteria for a primary diagnosis consistent with the most recent version of the International Statistical Classification of Diseases and Related Health Problems (ICD) diagnosis that correlates with the Diagnostic and Statistical Manual; **and**
- 3. The individual or collateral contact reports at least **one** of the following:
 - a. suicidal/assaultive/destructive ideas, threats, plans or actions; **or**
 - b. an acute or increasing loss of control over thoughts, behavior and/or affect that could result in harm to self or others; **or**
 - c. functional impairment or escalation in mood/thought/behavior that is disruptive to home, school, or the community or impacting the individual's ability to function in these settings; **or**
 - d. the symptoms are escalating to the extent that a higher level of care will likely be required without intervention; **or**
 - e. Acute stress reaction that threatens to lead to significant emotional and/or behavioral deterioration without rapid intervention, evaluation, and treatment and
- 4. There is evidence of at least **1 or more** of the following:
 - a. Indication that the symptoms will adequately resolve or stabilize within a 23 hour period at which time a less restrictive level of care will be appropriate or
 - b. The presenting clinical problem requires a safe, contained environment wherein observation and assessment can be conducted to determine next steps in the individual's care and
- 5. Without urgent intervention, the individual will likely decompensate which will further interfere with their ability to function in at least one of the following life domains: family, living situation, school, social, work, or community.

*The medical necessity for individuals admitted under a Temporary Detention Order (TDO) issued pursuant to section §37.2-800 et. seq. and §16.1-335 et seq. of the Code of Virginia is established and DMAS or its contractor cannot limit or deny services specified in a TDO (see the Temporary Detention Order Supplement to the Psychiatric Services Manual for additional details).

Discharge Guidelines:

Mental Health Services (formerly CMHRS), App. G - Comprehensive Crisis and Transition Services p. 20 (02/14/2023)

Regardless of the individual's clinical status, the service requires that individuals are discharged within 23 hours. The point at which that discharge occurs within that time frame may depend on **1 or more** of the following:

- Whether the individual no longer meets admission criteria or meets criteria for a less or more intensive level of care
- Determination and availability of the service or natural supports to which the individual is to be discharged into the care of

Required activities:

Mental Health Services (formerly CMHRS), App. G - Comprehensive Crisis and Transition Services p. 16 (02/14/2023)

In addition to the "Requirements for All Services" section of Chapter IV, the following required activities apply to 23-Hour Crisis Stabilization:

Assessment:

- At the start of services, a LMHP, LMHP-R, LMHP-RP or LMHP-S must conduct an assessment for determining medical necessity criteria and the individual's appropriateness for the service. The assessment requirement can be met by one of the following:
 - A Comprehensive Needs Assessment (see Chapter IV for requirements).
 - A prescreening assessment completed by the provider.
 - If a prescreening assessment has been completed within 72 hours prior to admission by another provider, the LMHP, LMHP-R, LMHP-RP or LMHP-S may review and create an update or addendum to the prescreening assessment.
 - A DBHDS approved assessment for 23-Hour Crisis Stabilization services can be used to meet this requirement if conducted by a LMHP, LMHP-R, LMHP-RP, or LMHP-S. Providers may use an existing DBHDS approved assessment for individuals transitioning from another crisis service or Community

Stabilization. At a minimum, an LMHP, LMHP-R, LMHP-RP or LMHP-S must review and update the DBHDS approved assessment.

- For individuals admitted with a primary diagnosis of substance use disorder, providers may choose to complete a multidimensional assessment meeting the criteria in Chapter IV of the Addiction and Recovery and Treatment Services Manual.
- A psychiatric evaluation must be completed at admission by a psychiatrist, nurse practitioner or physician assistant or nurse practitioner working under the psychiatrist.
 - The 23-Hour Crisis Stabilization provider may use a psychiatric evaluation completed within 24 hours prior to admission by a psychiatrist or nurse practitioner to meet this requirement. Documentation that the 23-Hour Crisis Stabilization psychiatrist, nurse practitioner or physician assistant has reviewed and updated (as clinically necessary) the evaluation at admission must be in the clinical record.
- 23-Hour Crisis Stabilization providers must have 24 hour in-person nursing. At a minimum, a nursing assessment must be completed at the time of admission to determine current medical needs. Nursing can be shared among co-located programs.

Care Coordination:

- Providers must follow all requirements for care coordination (See Care Coordination Requirements of Mental Health Providers section of Chapter IV).
- Coordination of withdrawal management services with a medical provider is required as necessary including medication and clinical supports.
- Appropriate transition to the next level of care shall be required. Documentation must include a demonstration of active transitioning from 23-hour crisis stabilization to an appropriate level of care which includes care coordination and communication with the individual's MCO or FFS Contractor, service providers and other collateral contacts.

Crisis Intervention:

- Development of a plan to maintain safety in order to prevent the need for a higher level of care; **or**
- Completion of a Crisis Education and Prevention Plan (CEPP) meeting DBHDS requirements. The CEPP process should be collaborative but must be directed and authorized by a LMHP, LMHP-R, LMHP-RP or LMHP-S. The CEPP meets the safety plan requirement; **or**
- If there is an existing Crisis Education and Prevention Plan (CEPP), the provider may review the CEPP and update as necessary with the individual. The CEPP meets the safety plan requirement.

The following components must be available to individuals in the treatment program and provided in accordance with the individual's assessed needs:

- Individualized treatment planning;
- Individual and family therapy
- Nursing on-site 24/7;
- Skills restoration and health literacy counseling;
- Assessment and evaluation as well as additional clinically indicated psychiatric and medical consultation services;
- Medical, psychological, psychiatric, laboratory, and toxicology services available on-site or by consult or referral;
- Crisis intervention and safety planning support available 24/7;
- Peer recovery support services, offered as an optional supplement for individuals;
- Care coordination through referrals to higher and lower levels of care, as well as community and social supports, to include the following:
 - The provider shall collaborate in the transfer, referral, and/or discharge planning process to ensure continuity of care;
 - The provider shall establish and maintain referral relationships with step-down programs appropriate to the population served;
 - The provider shall collaborate with the individual's primary care physician and other treatment providers such as psychiatrists, psychologists, and substance use disorder providers.

- At a minimum, required components of 23-Hour Crisis Stabilization include: assessment (psychiatric, nursing and LMHP), crisis intervention, and care coordination. Providers must have the capacity to provide any of the above components for up to 23 hours based on the individual's needs.
- Services must be provided in-person with the exception of the psychiatric evaluation and care coordination.
- Service delivery must be individualized. Group delivery of service components is not appropriate for this service.

Coding:

Medically necessary with criteria:

Coding	Description
90791	Psychiatric diagnostic evaluation
90792	Psychiatric diagnostic evaluation with medical services
S9485	Crisis intervention mental health services, per diem

are provided by the Department of Medical Assistance Services of Virginia (DMAS). Medical Policies may be superseded by state Medicaid Plan guidelines. Medical policies are not a substitute for clinical judgment or for any prior authorization requirements of the health plan. These policies are not an explanation of benefits.

Medical policies can be highly technical and complex and are provided here for informational purposes. These medical policies are intended for use by health care professionals. The medical policies do not constitute medical advice or medical care. Treating health care professionals are solely responsible for diagnosis, treatment and medical advice. Sentara Health Plan members should discuss the information in the medical policies with their treating health care professionals. Medical technology is constantly evolving and these medical policies are subject to change without notice, although Sentara Health Plan will notify providers as required in advance of changes that could have a negative impact on benefits.

The Early and Periodic Screening, Diagnostic and Treatment (EPSDT) covers services, products, or procedures for children, if those items are determined to be medically necessary to “correct or ameliorate” (make better) a defect, physical or mental illness, or condition (health problem) identified through routine medical screening or examination, regardless of whether coverage for the same service or support is an optional or limited service under the state plan. Children enrolled in the FAMIS Program are not eligible for all EPSDT treatment services. All requests for authorization for the services described by this medical policy will be reviewed per EPSDT guidelines. These services may be authorized under individual consideration for Medicaid members under the age of 21-years if the services are judged to be medically necessary to correct or ameliorate the member's condition. *Department of Medical Assistance Services (DMAS), Supplement B - EPSDT (Early and Periodic Screening, Diagnosis and Treatment) Manual.*
