Version 11

All requests for authorization for the services described by this medical policy will be reviewed per Early and Periodic Screening, Diagnostic and Treatment (EPSDT) guidelines. These services may be authorized under individual consideration for Medicaid members under the age of 21-years if the services are judged to by medically necessary to correct or ameliorate the member's condition. Department of Medical Assistance Services (DMAS), Supplement B - EPSDT (Early and Periodic Screening, Diagnosis and Treatment) Manual.*.

Description & Definitions:

Skin lesions, including: moles, skin tags, fibromas, tumors, keloids, and cysts are removed from an individual's body either surgically or with treatments including, but not limited to, corticosteroids, cryotherapy, etc.

A skin biopsy is a medical procedure that removes a small sample of tissue to examine for damage or disease.

Epidermal Nerve Fiber Density Testing is a measurement an intra-epidermal nerve fiber density (IENFD) by skin punch biopsy where a small specimen to identify the amount of nerve fibers in the skin.

 - This medical policy express Sentara Health Plan's determination of medically necessity of services, and they are based upon a review of currently available clinical information. These policies are used when no specific guidelines for coverage are provided by the Department of Medical Assistance Services of Virginia (DMAS). Medical Policies may be superseded by state Medicaid Plan guidelines. Medical policies are not a substitute for clinical judgment or for any prior authorization requirements of the health plan. These policies are not an explanation of benefits.
