support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.				
<b>Initial</b>	Authorization: 12 months			
□ I	Prescribed by or in consultation with an allergist, immunologist or pulmonologist			
	Member is 12 years of age or older			
	Has the member been approved for Fasenra <sup>®</sup> previously through the Sentara medical department?  ☐ Yes ☐ No			
	Member has been diagnosed with severe eosinophilic phenotype defined by a baseline (pre-Fasenra®) peripheral blood eosinophil level $\geq 150$ cells/microliter at the initiation of treatment			
i	Member is currently being treated with <u>ONE</u> of the following unless there is a contraindication or intolerance to these medications and must be compliant on therapy <u>for at least 90 consecutive days</u> within a year of request:			
[	High-dose inhaled corticosteroid (ICS) (e.g., greater than 500 mcg fluticasone propionate equivalent/day) <b>AND</b> an additional asthma controller medication (e.g., leukotriene receptor antagonist, long-acting beta-2 agonist (LABA), theophylline)			
[	One maximally dosed combination ICS/LABA product (e.g., Advair® (fluticasone propionate/salmeterol), Dulera® (mometasone/formoterol), Symbicort® (budesonide/formoterol))			
	Member has experienced ONE of the following (check box that applies):			
Ţ	☐ More than > 2 exacerbations requiring additional medical treatment (e.g., an increase in oral corticosteroid dose, emergency department, urgent care visits or hospitalizations) within the past 12 months			
Ţ	☐ Any prior intubation for an asthma exacerbation			
	Member has a baseline forced expiratory volume (FEV1) < 80% predicted normal (< 90% for members 12-17 years old) submitted within year of request			
a	Provider must submit member blood eosinophil count after a trial and failure of at least 90 consecutive days of therapy with high dose inhaled corticosteroids <u>AND</u> long-acting inhaled beta-2 agonist. A failure of these medications is defined as a blood count > 150 cells/microliter (submit labs collected within the past 12 months)			
1	Eosinophil count: Date:			

CLINICAL CRITERIA: Check below all that apply. All criteria must be met for approval. To

**Reauthorization:** 12 months. Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.

	ember has experienced a sustained positive clinical response to Fasenra therapy as demonstrated at least <b>ONE</b> of the following (check all that apply; chart notes must be submitted):
	Increase in percent predicted Forced Expiratory Volume (FEV1) from baseline (pre-treatment)
	Reduction in the dose of inhaled corticosteroids required to control asthma
	Reduction in the use of oral corticosteroids to treat/prevent exacerbation
	Reduction in asthma symptoms such as chest tightness, coughing, shortness of breath or nocturnal awakenings
	ember is currently being treated with <b>ONE</b> of the following unless there is a ntraindication or intolerance to these medications:
	High-dose inhaled corticosteroid (ICS) (e.g., greater than 500 mcg fluticasone propionate equivalent/day) <u>AND</u> an additional asthma controller medication (e.g., leukotriene receptor antagonist, long-acting beta-2 agonist (LABA), theophylline)
	One maximally dosed combination ICS/LABA product (e.g., Advair® (fluticasone propionate/salmeterol), Dulera® (mometasone/formoterol), Symbicort® (budesonide/formoterol))

## Medication being provided by a Specialty Pharmacy - PropriumRx

\*\*Use of samples to initiate therapy does not meet step edit/ preauthorization criteria. \*\*

\*Previous therapies will be verified through pharmacy paid claims or submitted chart notes. \*
