

CHILDHOOD IMMUNIZATION

Common Chart

Deficiencies:

- Documentation of “immunizations are up-to-date” is not adequate/ acceptable to be compliant for this measure
- While documentation of Parental Refusal is helpful to our understanding of why the child has not received vaccinations, this is not an exclusion for HEDIS purposes.

Tips to Improve HEDIS rate:

- Documentation of the initial Hepatitis B vaccine being given “at birth” or “in the hospital” is acceptable. In all other cases, a specific date of administration must be documented in the record.
- Request prior provider records when initiating care of a new patient.
- Access VIIS (Virginia Immunization Information System) database to eliminate duplication or gaps in care.

Children who turn 2 years old during the measurement year (currently 2018).

All vaccines must be completed **on or before the 2nd birthday**

Exclusion: Contraindication for a specific vaccine (e.g., anaphylactic reaction to the vaccine or it’s components)

* **4 DTap**

* **3 IPV**

* **1 MMR**

* **3 HiB**

* **3 Hepatitis B**

* **1 VZV (or documented chicken pox disease before 2nd birthday)**

* **4 pneumococcal conjugate**

* **1 Hepatitis A**

* **2 or 3 Rotavirus vaccines (Number of doses depends on the vaccine administered)**

* **2 Influenza vaccines with different dates of service (after age 6 months)**

CHILDHOOD IMMUNIZATIONS

Administrative Codes associated with this measure

CPT Codes

DTap vaccine administered: 90698, 90700, 90721, 90723

HiB vaccine administered: 90644-90648, 90698, 90721, 90748

Hepatitis A vaccine administered: 90633

Hepatitis B vaccine administered: 90723, 90740, 90744, 90747, 90748

IPV vaccine administered: 90698, 90713, 90723

Influenza vaccine administered: 90655, 90657, 90661, 90662, 90673,
90685-90688

Measles vaccine administered: 90705

Mumps vaccine administered: 90704

Rubella vaccine administered: 90706

Measles/Rubella vaccine administered: 90708

MMR vaccine administered: 90707

MMRV vaccine administered: 90710

Pneumococcal vaccine administered: 90669, 90670

Rotavirus vaccine (2 dose schedule) administered: 90681

Rotavirus vaccine (3 dose schedule) administered: 90680
