

Coronavirus Disease 2019 (COVID-19) Frequently Asked Questions - Members

Background: Optima Health has closely monitored the spread of coronavirus (COVID-19) and its variants in the United States and its presence in Virginia. In 2020, we extended additional coverage to our members in response to COVID-19. Earlier this year, the [Department of Health and Human Services \(HHS\) announced](#) that “although COVID-19 remains a public health priority, we are in a much better place in our response than we were three years ago, and we can transition away from the emergency phase.” As a result, the federal Public Health Emergency (PHE) for COVID-19 expired at the end of the day on May 11, 2023.

Where can I get more information or updates about COVID-19?

For more information, please visit the CDC website at [cdc.gov](https://www.cdc.gov). Medicaid and Medicare members can also visit the [COVID-19 fact sheet on the CMS website](#) for more information. For additional updates, you may also visit optimahealth.com/covid-19.

COMMERCIAL COVERAGE AFTER MAY 11, 2023

The temporary provisions to waive cost sharing for COVID-19 vaccines, testing, and related services ordered by a physician or other provider, and over-the-counter (OTC) tests (eight per member per month) ended on May 11, 2023.

- COVID-19 OTC at-home test kits are still covered as follows:
 - With prescription: covered under your plan’s pharmacy benefits at the tier 1 cost share and are limited to four tests per month unless medically necessary
 - Without a prescription: not covered
- COVID-19 tests or related services during a physician visit:
 - Have the applicable cost share depending on where you visit your physician
- COVID-19 vaccines:
 - In-network: covered as a preventive health service and is still \$0 for all plan types
 - Out-of-network: HMO will not be covered, PPO and POS will be covered at the applicable cost share
