

SENTARA COMMUNITY PLAN (MEDICAID)

PHARMACY PRIOR AUTHORIZATION/STEP-EDIT REQUEST*

Directions: The prescribing physician must sign and clearly print name (preprinted stamps not valid) on this request. All other information may be filled in by office staff; fax to 1-800-750-9692. No additional phone calls will be necessary if all information (including phone and fax #s) on this form is correct. If the information provided is not complete, correct, or legible, the authorization process can be delayed.

Drug Requested: Briumvi™ (ublituximab) (Pharmacy)

MEMBER & PRESCRIBER INFORMATION: Authorization may be delayed if incomplete.

Member Name: _____

Member Sentara #: _____ Date of Birth: _____

Prescriber Name: _____

Prescriber Signature: _____ Date: _____

Office Contact Name: _____

Phone Number: _____ Fax Number: _____

NPI #: _____

DRUG INFORMATION: Authorization may be delayed if incomplete.

Drug Name/Form/Strength: _____

Dosing Schedule: _____ Length of Therapy: _____

Diagnosis: _____ ICD Code, if applicable: _____

Weight (if applicable): _____ Date weight obtained: _____

Recommended Dosage and Administration:

- **Initial dose:** 150 mg intravenous infusion, followed 2 weeks later by a 2nd 450 mg intravenous infusion
- **Subsequent doses:** single 450 mg intravenous infusion every 6 months

CLINICAL CRITERIA: Check below all that apply. **All criteria must be met for approval.** To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.

Initial Authorization: 6 months

(Continued on next page)

- ☐ Has the member been approved for Briumvi™ previously through the Sentara Health Plans medical department?
 - ☐ Yes ☐ No
- ☐ Member is 18 years of age or older
- ☐ Member must have **ONE** of the following confirmed relapsing forms of multiple sclerosis (MS):
 - ☐ Relapsing-remitting MS (RRMS)*
 - ☐ Active Secondary-progressive MS (SPMS)**
 - ☐ Clinically Isolated Syndrome (CIS)***
- ☐ Member has a confirmed diagnosis of multiple sclerosis (MS) as documented by laboratory report (i.e., MRI)
- ☐ Member has tried and failed at least **TWO (2)** of the following preferred agents (**verified by chart notes or pharmacy paid claims; check each tried**)

<input type="checkbox"/> Avonex® (IFN beta-1b)	<input type="checkbox"/> Copaxone® 20mg (glatiramer acetate)	<input type="checkbox"/> dimethyl fumarate (generic Tecfidera®)
<input type="checkbox"/> fingolimod (generic Gilenya®)	<input type="checkbox"/> Kesimpta® (ofatumumab) *Step-edit required	<input type="checkbox"/> teriflunomide (generic Aubagio®)
<input type="checkbox"/> Other: _____		

- ☐ Provide clinical evidence that the Preferred drug(s) will not provide adequate benefit and list pharmaceutical drugs attempted and outcome.
- ☐ Member has been screened for the presence of Hepatitis B virus (HBV) prior to initiating treatment AND does not have active disease (i.e., positive HBsAg and anti-HBV tests)
- ☐ Member has had baseline serum immunoglobulin assessed
- ☐ Member will not receive live or live attenuated vaccines while on therapy or within 4 weeks prior to the initiation of treatment
- ☐ Member is free of an active infection
- ☐ Member has not received a dose of Ocrevus® or Briumvi™ within the past 5 months

(Continued on next page)

Reauthorization: 12 months. Check below all that apply. **All criteria must be met for approval.** To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.

- ☐ Member continues to meet the relevant criteria identified in the initial criteria
- ☐ Member has an absence of unacceptable toxicity from the drug
- ☐ Member is being continuously monitored for response to therapy to indicate a beneficial response

***Definitive diagnosis of MS with a relapsing-remitting course is based upon BOTH dissemination in time and space. Unless contraindicated, MRI should be obtained (even if criteria are met).**

Dissemination in time (Development/appearance of new CNS lesions over time)	Dissemination in space (Development of lesions in distinct anatomical)
<input type="checkbox"/> ≥ 2 clinical attacks; OR <input type="checkbox"/> 1 clinical attack AND one of the following: <ul style="list-style-type: none"> • MRI indicating simultaneous presence of gadolinium-enhancing and non-enhancing lesions at any time or by a new T2- hyperintense or gadolinium-enhancing lesion on follow-up MRI compared to baseline scan • CSF-specific oligoclonal bands 	<input type="checkbox"/> ≥ 2 lesions; <input type="checkbox"/> 1 lesion AND one of the following: <ul style="list-style-type: none"> • Clear-cut historical evidence of a previous attack involving a lesion in a distinct anatomical location • MRI indicating ≥ 1 T2-hyperintense lesions characteristic of MS in ≥ 2 of 4 areas of the CNS (periventricular, juxtacortical, infratentorial, or spinal cord)

****Active secondary progressive MS (SPMS) is defined as the following:**

- ☐ Expanded Disability Status Scale (EDSS) score ≥ 3.0 ; AND
- ☐ Disease is progressive ≥ 3 months following an initial relapsing-remitting course (i.e., EDSS score increase by 1.0 in members with EDSS ≤ 5.5 or increase by 0.5 in members with EDSS ≥ 6); AND
 - ≥ 1 relapse within the previous 2 years; OR
 - Member has gadolinium-enhancing activity OR new or unequivocally enlarging T2 contrast-enhancing lesions as evidenced by MRI

(Continued on next page)

*****Definitive diagnosis of CIS is based upon ALL of the following:**

- ☐ A monophasic clinical episode with member-reported symptoms and objective findings reflecting a focal or multifocal inflammatory demyelinating event in the CNS
- ☐ Neurologic symptom duration of at least 24 hours, with or without recovery
- ☐ Absence of fever or infection
- ☐ Member is not known to have multiple sclerosis

******Definitive diagnosis of MS with a primary progressive course is based upon the following:**

- ☐ 1 year of disability progression independent of clinical relapse; AND
- ☐ TWO of the following:
 - ≥ 1 T2-hyperintense lesion characteristic of MS in one or more of the following regions of the CNS: periventricular, cortical or juxtacortical, or infratentorial
 - ≥ 2 T2-hyperintense lesions in the spinal cord
 - Presence of CSF-specific oligoclonal bands

Medication being provided by: Please check applicable box below.

- ☐ Location/site of drug administration: _____
- ☐ NPI or DEA # of administering location: _____

OR

- ☐ Specialty Pharmacy – PropriumRx

*****Use of samples to initiate therapy does not meet step edit/ preauthorization criteria.*****

****Previous therapies will be verified through pharmacy paid claims or submitted chart notes.****
