

JULY 9, 2025

**NOTIFICATION OF MEDICATION RECALL**

Dear Member,

We are reaching out regarding a medication you may have received.

B. Braun Medical Inc. is issuing a voluntary recall of five (5) lots of sodium chloride 0.9% injection. The recall was initiated on June 17, 2025, because there is potential for fluid leakage originating from pinholes in the same location of the bag. The size of the pinhole is small and therefore leakage only occurs when physical pressure is applied to the bag. The contents of the container may be contaminated due to compromising the sterile barrier of the product, potentially resulting in bloodstream infection. In some patients, such as immunocompromised patients and infants, a bloodstream infection is a life-threatening event.

The affected lot numbers are in the chart below.

Product Description	NDC	Lot Number and Manufacturer
0.9% Sodium Chloride Injection in EXCEL IV Container, 500 mL	00264-7800-10	J4L260, B. Braun Medical J4L261, B. Braun Medical J4L270, B. Braun Medical J4L271, B. Braun Medical J4L280, B. Braun Medical

Please contact your pharmacy and/or your provider to determine if you may have been impacted and if you need to take any action.

If you have any questions about this letter or the recall, please reach out to B. Braun Medical Inc. Information Recalls Department by phone at 1- 844-903-6417.

Sincerely,

Your Sentara Medicare Team
