SENTARA HEALTH PLANS

PHARMACY PRIOR AUTHORIZATION/STEP-EDIT REQUEST*

<u>Directions</u>: <u>The prescribing physician must sign and clearly print name (preprinted stamps not valid)</u> on this request. All other information may be filled in by office staff; <u>fax to 1-800-750-9692</u>. No additional phone calls will be necessary if all information (including phone and fax #s) on this form is correct. <u>If the information provided is not complete, correct, or legible, the authorization process can be delayed.</u>

<u>Drug Requested</u>: Winrevair[™] (sotatercept)

MEMBER & PRESCRIBER INFORMATION: Authorization may be delayed if incomplete.				
Member Name:				
Member Sentara #:	Date of Birth:			
Prescriber Name:				
Prescriber Signature:	Date:			
Office Contact Name:				
Phone Number:				
NPI #:				
DRUG INFORMATION: Authoriz				
Drug Name/Form/Strength:				
Dosing Schedule:	ng Schedule: Length of Therapy:			
Diagnosis:	ICD Code, if applicable:			
Weight (if applicable):	Date weight obtained:			
	al: 0.3 mg/kg once every 3 weeks; increase to target dose 0.7 mg/kg counts are verified to be within an acceptable range			
Quantity Limit:				

- 1 kit per 21 days (both strengths)
- Maximum 120 mg every 3 weeks

Injection Volume (mL) =
$$\frac{Weight (kg) x (\frac{0.3 mg}{kg} or \frac{0.7 mg}{kg})}{50 mg/mL}$$

(Continued on next page)

Winrevair Kit Type Based on Injection Volume for Dose of 0.3 mg/kg				
Injection Volume (mL)	Kit Type (NDC)	Quantity Limit		
0.2 to 0.9	45 mg kit, containing 1 x 45 mg vial (00006-5090-01)	1 kit per 21 days		
1 to 1.1	60 mg kit (containing 1 x 60 mg vial) (00006-5091-01)	1 kit per 21 days		
Winrevair Kit Type Based on Injection Volume for Dose of 0.7 mg/kg				
Injection Volume (mL)	Kit Type (NDC)	Quantity Limit		
0.4 to 0.9	45 mg kit, containing 1 x 45 mg vial (00006-5090-01)	1 kit per 21 days		
1 to 1.2	60 mg kit, containing 1 x 60 mg vial (00006-5091-01)	1 kit per 21 days		
1.3 to 1.8	90 mg kit, containing 2 x 45 mg vials (00006-5087-01)	1 kit (2 vials) per 21 days		
1.9 to 2.4	120 mg kit, containing 2 x 60 mg vials (00006-5088-01)	1 kit (2 vials) per 21 days		

CLINICAL CRITERIA: Check below all that apply. All criteria must be met for approval. To support each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be provided or request may be denied.

Initial Authorization: 6 months

- \square Member is ≥ 18 years old
- Provider is a clinician with expertise in treating patients with pulmonary arterial hypertension
- ☐ Member has a diagnosis of pulmonary arterial hypertension (PAH), WHO Group 1
- Diagnosis of PAH has been confirmed by an expert center meeting ALL the following criteria:
 - Hemodynamic definitions obtained from a right heart catheterization (RHC)
 - Medical chart notes and results from the right heart catheterization, laboratory documentation, imaging results, pulmonary function tests, arterial blood gases, are required to be submitted with this request
 - \square A mean arterial pressure (mPAP) measured ≥ 20 mmHg at rest
 - \square A pulmonary artery wedge pressure (PAWP) measured ≤ 15 mmHg
 - \square A pulmonary vascular resistance (PVR) measured ≥ 2 Woods unit

(Continued on next page)

	Member's functional class defined by the World Health Organization classification meets ONE of the following:
	☐ Functional Class II: Patients with PH resulting in slight limitation of physical activity. They are comfortable at rest. Ordinary physical activity causes undue dyspnea or fatigue, chest pain, or near syncope.
	☐ Functional Class III: Patients with PH resulting in marked limitation of physical activity. They are comfortable at rest. Less than ordinary activity causes undue dyspnea or fatigue, chest pain, or near syncope.
	Member is currently established on therapy for PAH on at least <u>TWO</u> (2) treatments for at least 90 days from the following drug classes: Phosphodiesterase Type-5 Inhibitor, Endothelin Receptor Antagonist, Soluble cGMP Stimulator, or Prostacyclin Receptor Agonist. (NOTE: in the absence of medical and pharmacy claims history to confirm current maintenance treatment, medical history submitted by the provider will be required)
	Member's pre-treatment 6-minute Walking Distance (6MWD) has been recorded prior to starting therapy with Winrevair and submitted with this request
	Member's baseline platelet count has been obtained prior to starting therapy and that documentation has been attached to this request [NOTE: the provider attests Winrevair will NOT be initiated if the platelet count is < 50,000/mm ³]
	Member's baseline hemoglobin level has been obtained prior to starting therapy and that documentation has been attached to this request
	Provider attests to assessing that the patient's current status and history for risk of bleeding (i.e., comorbidities, concomitant treatments) does NOT preclude the member from initiating Winrevair
	Females of childbearing potential have a negative pregnancy test prior to start of therapy, and have been counseled to use an effective method of contraception
ppc	uthorization: 12 months. Check below all that apply. All criteria must be met for approval. To ort each line checked, all documentation, including lab results, diagnostics, and/or chart notes, must be ded or request may be denied.
	Member has been observed to have a positive clinical response since the beginning of therapy evidenced by disease stability, or mild progression, in any of the following (submitted in documentation and charted in clinical notes):
	□ 6MWD
	□ WHO Functional Class
	Pulmonary vascular resistance on a right heart catheterization
	□ N-terminal pro b-type natriuretic peptide (NT-proBNP) level

PA Winrevair (CORE) (Continued from previous page)

Medication being provided by Specialty Pharmacy – Proprium Rx		
	Females of childbearing potential have been counseled to use an effective method of contraception	
	Platelet count and hemoglobin levels have been monitored since the start of therapy, and follow-up documentation has been submitted confirming levels do not warrant pausing of therapy	
	Member is <u>NOT</u> experiencing unacceptable intolerability or toxicity from therapy (i.e., excessive bleeding, decreased platelet count, increased hemoglobin)	

^{*}Previous therapies will be verified through pharmacy paid claims or submitted chart notes. *
