**All requests for authorization for the services described by this medical policy will be reviewed per Early and Periodic Screening, Diagnostic and Treatment (EPSDT) guidelines. These services may be authorized under individual consideration for Medicaid members under the age of 21-years if the services are judged to be medically necessary to correct or ameliorate the member's condition. Department of Medical Assistance Services (DMAS), Supplement B - EPSDT (Early and Periodic Screening, Diagnosis and Treatment) Manual.**

## Purpose:

This policy addresses ASAM Level 4.0 Medically Managed Intensive Inpatient Admission for Substance Abuse Adult Initial for Medicaid.

## Description & Definitions:

Intensive inpatient provides 24-hour professionally directed evaluation, observation, and medical and addiction treatment in a facility. A medically managed facility provides nursing care to monitor biomedical conditions during addiction treatment.

Biomedical enhanced services are delivered by appropriately credentialed medical staff, who are available to assess and treat co-occurring biomedical disorders and to monitor the resident's administration of medications in accordance with a physician's prescription. The intensity of nursing care and observation is sufficient to meet the patient's needs.

Co-Occurring Capable - Treatment programs that address co-occurring mental and substance related disorders. They provide assessment, treatment planning, program content and discharge planning. They can provide psychopharmacologic monitoring and psychological assessment and consultation, either on site or through coordinated consultation with off-site providers.

Co-Occurring Enhanced - Describes treatment programs that incorporate policies, procedures, assessments, treatment, and discharge planning processes that accommodate patients who have co-occurring mental and substance related disorders. Mental health symptom management groups are incorporated into addiction treatment. Motivational enhancement therapies specifically designed for those with co-occurring mental and substance-related disorders are

more likely to be available (particularly in out-patient settings) and, there is close collaboration or integration with a mental health program that provides crisis backup services and access to mental health case management and continuing care. In contrast to Co-Occurring Capable services, Co-Occurring Enhanced services place their primary focus on the integration of services for mental and substance-related disorders in their staffing, services, and program content.

## Criteria:

Admission to Medically Managed Inpatient Services level of care for substance-related disorder is considered medically necessary when the following ASAM dimensions are met. The individual, 18 years or older meets ASAM criteria for Medically Managed Inpatient Services when one is met from dimensions 1, 2 or 3 are met initial services.

- Individual must meet **ALL** of the following:
    - **Diagnosis**: The individual has at least one diagnosis from the most recent Diagnostic and Statistical Manual of Mental Disorders for Substance-Related and Addictive Disorders with the exception of tobacco-related disorders, caffeine use disorder or dependence, and nonsubstance-related addictive disorders
    - Individual Must meet either dimension 1, 2 or 3 by **1 or more** of the following
        - **Dimension 1**: Acute intoxication and/or withdrawal potential: Patient has life threatening withdrawal symptoms, possible or experiencing seizures or DT's or other adverse reactions are imminent.
        - **Dimension 2**: Biomedical conditions/complications: Severe instability requires 24-hour medical care in a licensed medical facility. May be the result of life threatening withdrawal or other co-morbidity
        - **Dimension 3**: Emotional/Behavioral/Cognitive Conditions: Severely unstable requires 24-hour psychiatric care.

There is insufficient scientific evidence to support the medical necessity of intensive inpatient admission for substance abuse for uses other than those listed in the clinical indications for procedure section.

**Service Units and Limitations:**

- Members shall be discharged from this service when other less intensive services may achieve stabilization.
- One unit of service is one day.
- There are no maximum annual limits.
- Group substance use counseling by CATPs, CSACs and CSAC supervisees shall have a maximum limit of 12 individuals in the group or less depending on the clinical model. Group size may exceed this limit based on the determination of the CATP. Such counseling shall focus on the needs of the members served.
- CSACs and CSAC-supervisees by scope of practice are able to perform group substance use counseling, thus could provide counseling and psychoeducational services in this level of care.

**Discharge/Transfer Criteria It is appropriate to transfer or discharge the member from the present level of care if he or she meets the following criteria:**

- The member has achieved the goals articulated in the ISP, thus resolving the problem(s) that justified admission to the current level of care; or
- The member has been unable to resolve the problem(s) that justified admission to the present level of care, despite amendments to the ISP. Treatment at another level of care or type of service therefore is indicated; or
- The member has demonstrated a lack of capacity to resolve his or her problem(s). Treatment at another level of care or type of service therefore is indicated; or
- The member has experienced an intensification of his or her problem(s), or has developed a new problem(s), and can be treated effectively only at a more intensive level of care.

## Coding:

CPT/HCPCS codes considered **medically necessary** if policy criteria are met:

| Coding | Description |
|---|---|

| | |
|---|---|
| H0011 | Alcohol and/or drug services; acute detoxification (residential addiction program inpatient) |

CPT/HCPCS codes considered **not medically necessary** per this policy:

| Coding | Description |
|---|---|
| | None |

*The preceding codes are included above for informational purposes only and may not be all inclusive. Additionally, inclusion or exclusion of a treatment, procedure, or device code(s) does not constitute or imply member coverage or provider reimbursement.*

## Policy Approach and Special Notes:

- Coverage: See the appropriate benefit document for specific coverage determination. Member specific benefits take precedence over medical policy.
- Application to Products: Policy is applicable to Sentara Health Plans Virginia Medicaid Products Only.
  - See MCG guidelines for all other Lines of Business.
- Authorization Requirements: Pre-certification by the Plan is required.
- Special Notes:
  - This medical policy express Sentara Health Plan's determination of medically necessity of services, and they are based upon a review of currently available clinical information. These policies are used when no specific guidelines for coverage are provided by the Department of Medical Assistance Services of Virginia (DMAS). Medical Policies may be superseded by state Medicaid Plan guidelines. Medical policies are not a substitute for clinical judgment or for any prior authorization requirements of the health plan. These policies are not an explanation of benefits.
  - Medical policies can be highly technical and complex and are provided here for informational purposes. These medical policies are intended for use by health care professionals. The medical policies do not constitute medical advice or medical care. Treating health care professionals are solely responsible for

diagnosis, treatment and medical advice. Sentara Health Plan members should discuss the information in the medical policies with their treating health care professionals. Medical technology is constantly evolving and these medical policies are subject to change without notice, although Sentara Health Plan will notify providers as required in advance of changes that could have a negative impact on benefits.

- The Early and Periodic Screening, Diagnostic and Treatment (EPSDT) covers services, products, or procedures for children, if those items are determined to be medically necessary to "correct or ameliorate" (make better) a defect, physical or mental illness, or condition (health problem) identified through routine medical screening or examination, regardless of whether coverage for the same service or support is an optional or limited service under the state plan. Children enrolled in the FAMIS Program are not eligible for all EPSDT treatment services. All requests for authorization for the services described by this medical policy will be reviewed per EPSDT guidelines. These services may be authorized under individual consideration for Medicaid members under the age of 21-years if the services are judged to by medically necessary to correct or ameliorate the member's condition. Department of Medical Assistance Services (DMAS), Supplement B - EPSDT (Early and Periodic Screening, Diagnosis and Treatment) Manual.
- Service authorization requests must be accompanied by sufficient clinical records to support the request. Clinical records must be signed and dated by the requesting provider withing 60 days of the date of service requested.
