Financial Yearly Trend (Quarterly View with Variance Report)	9
How to Drill Down into Data	9

Purpose

The purpose of this user guide is to outline the following:

- adding the variance report feature
- customizing filters with variances
- interpreting metrics and drilling further into data

Overview

For advanced DataPoint users, it will be beneficial to understand variances in data over time (multiple quarters and/or years). Within the system, there are various summary reports that allow a user to drill down further into the data. The tool has a feature known as **Variance Reports** which will illustrate data trends over time once you select the filters, metrics, and dimensions desired. These trends may help the user understand the cost and frequency of utilization impacting your group plan and assist in making data-driven decisions. We will walk through a few examples in this user guide. If you need additional assistance, please contact datapoint@sentara.com.

Adding the Variance Report Feature to a Summary Report

Navigate to the Financial drop down and click on Financial Yearly Trend.

When you pull the standard **Financial Yearly Trend** report, you will see total claims year over year but will not see a variance.

To understand the variance year over year, click **Options** on the right-hand side of the report.

Click Variance Report.

You can then choose your **Report Format**, **Variance Type**, and **Display Preferences**.

Tip: It is recommended to leave the **Report Format** and **Variance Type** options as is. It is also recommended that you change **Display Preferences** to **Show Percent (%) Variance**. This will illustrate the relative changes over time vs. absolute value of the change.

Click Create Report.

Report Format:	 Horizontal (Left to Right) 	Preview:

Customizing Filters with Variances

You have the option to change the paid years filter to a paid quarter filter to see a quarter over quarter comparison.

To do this, click on **All Filters** and change **Paid Year** to **Paid Quarter** by searching for **Paid Quarter**. Choose **Trend** and **4 Quarters** to give the most recent four quarters' information.

Before you click update, ensure you have updated your Column to **Paid Quarter** as well.

Click **Update**.

Tip: Once you have created a variance report, you can set an alert for certain metrics and save the report as a **Favorite**. Please reference the *Alerts User Guide* and the *Overall Basic Functionality User Guide* on steps for creating alerts and/or saving reports as a **Favorite**.

Interpreting Metrics

Once you have added the variance feature to your **Summary Report**, you can begin interpreting what the data is telling you. As stated previously, it is best to have a large enough period of review to really interpret metrics to be able to make data-driven decisions. Below are two examples that provide insights into interpreting the metrics in these summary reports.

Financial Yearly Trend (Quarterly View with Variance Report)

Continuing with the above example, looking at just the **Surgical** rows under **Line Service Type**, you will notice changes quarter-over- quarter. In the below example we see the trend in **Surgical** going down each quarter in plan-paid dollars (shown in the **Paid** row). We also notice trends in member **Out of Pocket** costs. You can see **Out of Pocket** costs increased from Q4 2020 to Q1 2021. This could be a result of deductibles resetting for a new plan year. However, moving into Q2 vs. Q1, we see a decrease in member **Out of Pocket** costs.

Drill down to the absolute dollars to help put percentages in context.

Line Service Type	2020Q4	2021Q1	2021Q1 % Var		2021Q2	2021Q2 % Var		2021Q3		2021Q3 % Var
Surgical										
Allowed	\$1,091,065.00	\$871,480.30	*	-20.13%	\$370,636.83	*	-57.47%	\$225,399.35	*	-39.19%
Paid	\$1,082,240.95	\$856,846.58	*	-20.83%	\$367,715.66	*	-57.09%	\$196,955.85	*	-46.44%
Out of Pocket	\$8,824.05	\$14,633.72	*	+65.84%	\$2,921.17	*	-80.04%	\$3,794.50	*	+29,90%

How to Drill Down into Data

To dig deeper into the Surgical data to understand drivers, click on Surgical.

Surgical							
Allowed	\$1,091,065.00	\$871,480.30		\$370,636.83	+ -57.47%	\$225,399.35

Update								

Your report will now populate with a quarter-over-quarter view of the CCSR ICD10 Dx Categories within the **Inpatient Surgical Service Type**. Several conclusions can be made. Some examples are outlined below:

- Diseases of the Circulatory System there is little change in absolute Allowed and Paid dollars from Q4 to Q1 in this Dx category. However, there is a decrease in absolute Allowed and Paid dollars from Q2 to Q1 indicating less inpatient surgical costs on the Circulatory System.
- Diseases of the Digestive System there is a significant decrease in absolute Allowed and Paid dollars from Q4 to Q1 in this Dx category. This Dx category impacted the net variance for the Surgical Service Type.
- 3. Diseases of the Musculoskeletal System and Connective Tissue there is a significant increase in the absolute Allowed and Paid costs from Q4 to Q1. Additionally, this category is a driver for the Inpatient Surgical Out of Pocket costs from Q4 to Q1.
